ABOUT ME

Entry-level software engineer skilled in web development and AI integration, with experience in Frontend (HTML, CSS, JavaScript, React.js, Next.js) and Backend (Node.js, Express.js, MongoDB, MySQL). Familiar with Generative AI solutions and AI-powered features, having built and launched projects combining responsive design with intelligent functionality. Eager to apply my skills to create engaging, user-focused applications.

WORK EXPERIENCE

Full-Stack Developer Intern at Cubics Softwares Solutions, Remote July 2025 – Present
– Contributing to full-stack development of live projects, focusing on responsive and user-friendly interfaces with React.js, JavaScript, TypeScript, HTML, and CSS, while managing backend operations using MongoDB and related server-side technologies. Actively involved in code reviews, debugging, optimization, and gaining practical experience in complete development workflows under senior developer guidance.

PROJECTS

AI Image Caption Generator [Link to Demo](#)

Built a MERN stack application that accepts user-uploaded images, uses computer vision and AI-powered image recognition to detect objects, and generates descriptive captions

Emotion-Based Music Player [Link to Demo](#)

Developed a MERN stack music player that uses facial expression detection to suggest songs matching the user's mood. I used face detection API and a clean, responsive interface for an engaging listening experience

Mini Job Portal Web Application [Link to Demo](#)

Built a MERN stack job portal where employers can post jobs and candidates can apply. Implemented features like user authentication, employer dashboard and responsive UI. Worked with MongoDB, Express.js, React.js, and Node.js to deliver a smooth, user-friendly experience.
